

Programming AWK/NAWK

Instructor led training (2 days)

Intended Audience

- Application developers who need to learn how to program using AWK

Course Scope:

- The course provides the necessary training and preparation required to build applications in AWK

Why is this course unusual?

- Highly Interactive
 - Labs are more than 50% of the time spent in class
- Concepts are reinforced with tests:
 - Studies have shown that retention rates from courses including hands-on activities, AND those including tests, are far higher than for passive training.
 - This course provides both of these features to offer the highest quality AWK training available today.

Prerequisites :

- Unix/Linux Fundamentals or equivalent

Content:

- Introduction
- Use cases
- Command line and from scripts
- Pattern matching
- Expressions
- Output
- Scripts
- Expressions
- Operators
- Flow control
- Variables
- Input
- Output
- File I/O
- Functions
- Strings
- Math operators
- Arrays

Audio-visual & instructional requirements for on-site classes:

- Overhead projector
- Flip chart or marker board desirable
- DCE Software
- A laptop or PC for each student
- Networked environment
